

TechCONNECT

Asset Management Capabilities

TechFORCE offers you complete, consistent and real-time information to help you get the most of your IT assets and gain a competitive advantage.

TechFORCE's IT Asset Management tracks and manages your assets and their changing configurations and relationships throughout every stage of the lifecycle. As a result, you can maintain updated technology and better align deployed assets with enterprise and business requirements.

TechFORCE's unique in-house software application is a best-of-breed, modular solution that accurately manages the complete life cycle of IT resources throughout the entire extended enterprise, including:

Systems: Laptops, desktops, servers

Network Devices: Routers, switches, modems, hubs, storage arrays

Printers: Laser, desktop, receipt

Software: Operating systems, applications, licensing, versions

Analytical Reporting & Visibility

TechNET's combination of simplicity and flexibility offers our customers many different asset reporting capabilities. These reports allow you to obtain vital information by site or by item number such as:

- Comprehensive equipment listings
- Software application and licensing information
- Tracking of warranty and maintenance coverage
- Warranty, maintenance, cancellation, and expiration dates
- Serial Numbers
- Individual component level data such as internal parts within systems or options within devices
- Equipment additions, moves, and changes
- Complete equipment history

TechNET reports can be scheduled for automatic email delivery to specified individuals or can be viewed at your convenience. Each report can be previewed, printed or output to Microsoft® Word, Excel or Text formats.

For more information, please call (866) 832-7253 or (866) TF2-SALE.
